

Sprint 3 Plan

Product name: Chaptre,
Version 2.0,
Revision: Feb, 13, 2025

High level goals:

Have Users be able to search for a specific book by Name, Author, or genre

Story points: Fibonacci, [1, 2, 3, 5, 8, 13, 21, 34]

Sprint 3:

- ☐ As a reader interested in a specific story I need to be able to search for it by name so that I can easily find what I'm looking for. [3, High]
 - ☐ Search Title Indexing, 6 hours
- ☐ As a reader looking for a specific author, I can search for the author by name. [3, High]
 - ☐ Search Author name Indexing, 4 hours
- ☐ As an avid horror fan, I should be able filter stories by using the horror tag. [3, Medium]
 - ☐ Genre tagging, 2 hours
 - ☐ Tag based filtering, 2 hours
- ☐ As a busy person I need to be able to save my drafts and come back to them later so that I can write my stories/chapters in increments [8, High]
 - ☐ Create a save as draft feature/button, 2 hours
 - ☐ Create a portion in the app which shows the drafts, 2 hours

Spikes: searching feature for the database and the frontend UI for it

Team Roles:

- Product Owner: Yali
- Scrum Master: Nathan
- Developer(s): Sai, Neel, Kasra

Initial task assignment:

Draft/Subscribe to an author: Kasra

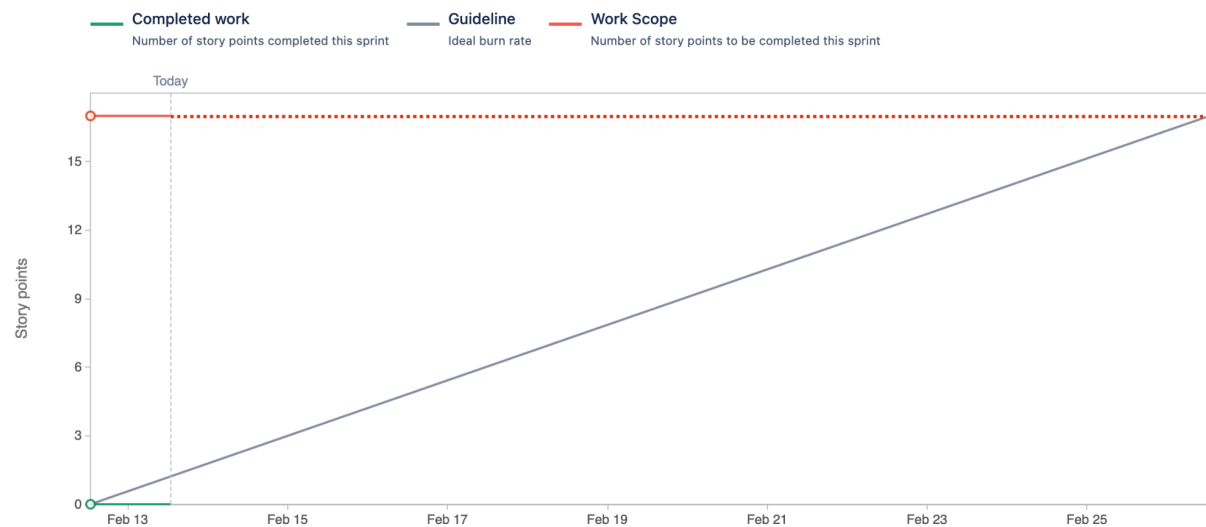

Profile pictures/cover photos: Yali
Search/front end: Sai
Search with tags: Nathan
Bookmarking/editability of chapter/book: Neel

Spikes:

- Find extension to use for search

Initial burnup chart:

Date - February 12th, 2025 - February 26th, 2025

Meeting times:

9:30-9:45 MWF
